Gilbert Magic Series

49
48

A simple chemical experiment.

Fill a test tube with water and add a small amount of hydrochloric acid. The tube will burst open, releasing a gas.

Gilbert Chemical Magic

Curious Experiments

This is a simple experiment to demonstrate the principles of chemical reactions.

Figure 13

The tube will burst open due to the release of gas.

With a sharp, these experiments can be repeated many times.
Placing a Glass of Water in such a Position that no One Can Remove It without Upsetting the Water

**Figure 2**

![Diagram of a glass of water with a candle placed on it]

**Note:** The trick should be performed in a room where there is no draught.

If you follow the instructions exactly, the candle will burn down the glass of water. If you place the glass of water on a level surface, the candle will not burn down the glass. If you place the glass of water on a tilted surface, the candle will burn down the glass.

This is an interesting experiment, but be careful not to burn your fingers.

---

**The Musical Flame**

This is a very interesting experiment! It demonstrates that if you place a lit candle on a glass of water, the water will not extinguish the flame.

WHAT A GLASSFUL OF WATER WILL HOLD

and even "Go to sleep" with a smile of winning motion. While the bowl of salt and the plate of water has your child spread the salt on the plate. The child then says "Go to bed" and while he is sleeping, you spread the salt on the plate and put it next to the child's bed. While he is sleeping, you place the plate next to his bed.

WHICH IS THE BOLTED EGG?

And now, what we can do with an egg, we can do with other things.

THE MYSTERIOUS EGG

WHAT TO REACH THE WATER IN

The pressure of the air keeps the water in the glass.
The Magic of Superficial Tension

To perform the trick, be prepared and the spectators glanced. A spoon of water, a piece of soap, a finger to moisten the corner, forming the edge. In a bowl of water, move around the corner, forming the edge.

DIABOLICAL DOR

The spectators will be amused by the trick performed. In fact, the spectators will be amazed by the trick performed. In fact, the spectators will be amazed by the trick performed.

TO CHANGE THE COMPOSITION FROM WHITE TO BLACK

The spectators will be amazed by the trick performed. In fact, the spectators will be amazed by the trick performed. In fact, the spectators will be amazed by the trick performed.

CIBERTR MAGIC SERIES 66
The ice factory

Open the door of the metal box. Take care to not cut your fingers. By lifting the lid of the box, a lot of cold air flows out. The water in the ice factory is very cold, so use protective equipment to avoid frostbite. If you want to make a big ice cube, fill the box with water and freeze it overnight. If you want to make small ice cubes, fill the box with water and let it sit in the sun for a day.
